## From the desk of the Chancellor...

Encouraged by the success of Jagruti towards Electoral Awareness, REVA spearheaded Jagruti Phase 2, a more participatory podium for students wherein we decided to engage with students and residents in the last year and focus on the theme of Global Warming. This time the engagement was to be more direct and hands on. The thought occurred to me as I strongly felt that our generation and previous generations have made a big mess of our Planet Earth. Now, our challenge is to clean up the mess to save our environment and future generations with no time to waste. Global warming has taken its toll on humanity and it is the need of the hour to act fast to bring down the harmful consequences. Of course, we cannot reverse the damage we have done to this world, but at least we can prevent further cluttering of our beautiful Earth.

Global warming is not a recent issue as it had been happening from the past few decades. As you know, we have been hearing from a long time about the melting of icebergs, rising of ocean levels, uprooting of trees, etc., are causing serious effects on our nature. All of us have to make a conscious effort and take sensible steps to prevent further damage to our environment.

REVA University has started sustainable efforts to fight against the disastrous effects of global warming through the digital campaign- Jagruti towards Global Warming. Through this digital campaign, the University desired to create awareness against the disheartening effects of global warming amongst people around the world. The motive behind the initiation of a digital campaign is to

involve the youth of our nation and world at large because today's generation is always glued to digital gadgets. I am glad that the campaign moved in the direction as set by the University and impacted many lives apart from creating a sensitivity towards our Environment. Let the spirit spread as we continue to impact the environment around us and influence mankind!

**Dr P Shyama Raju**  
**Chancellor**  
**REVA University**

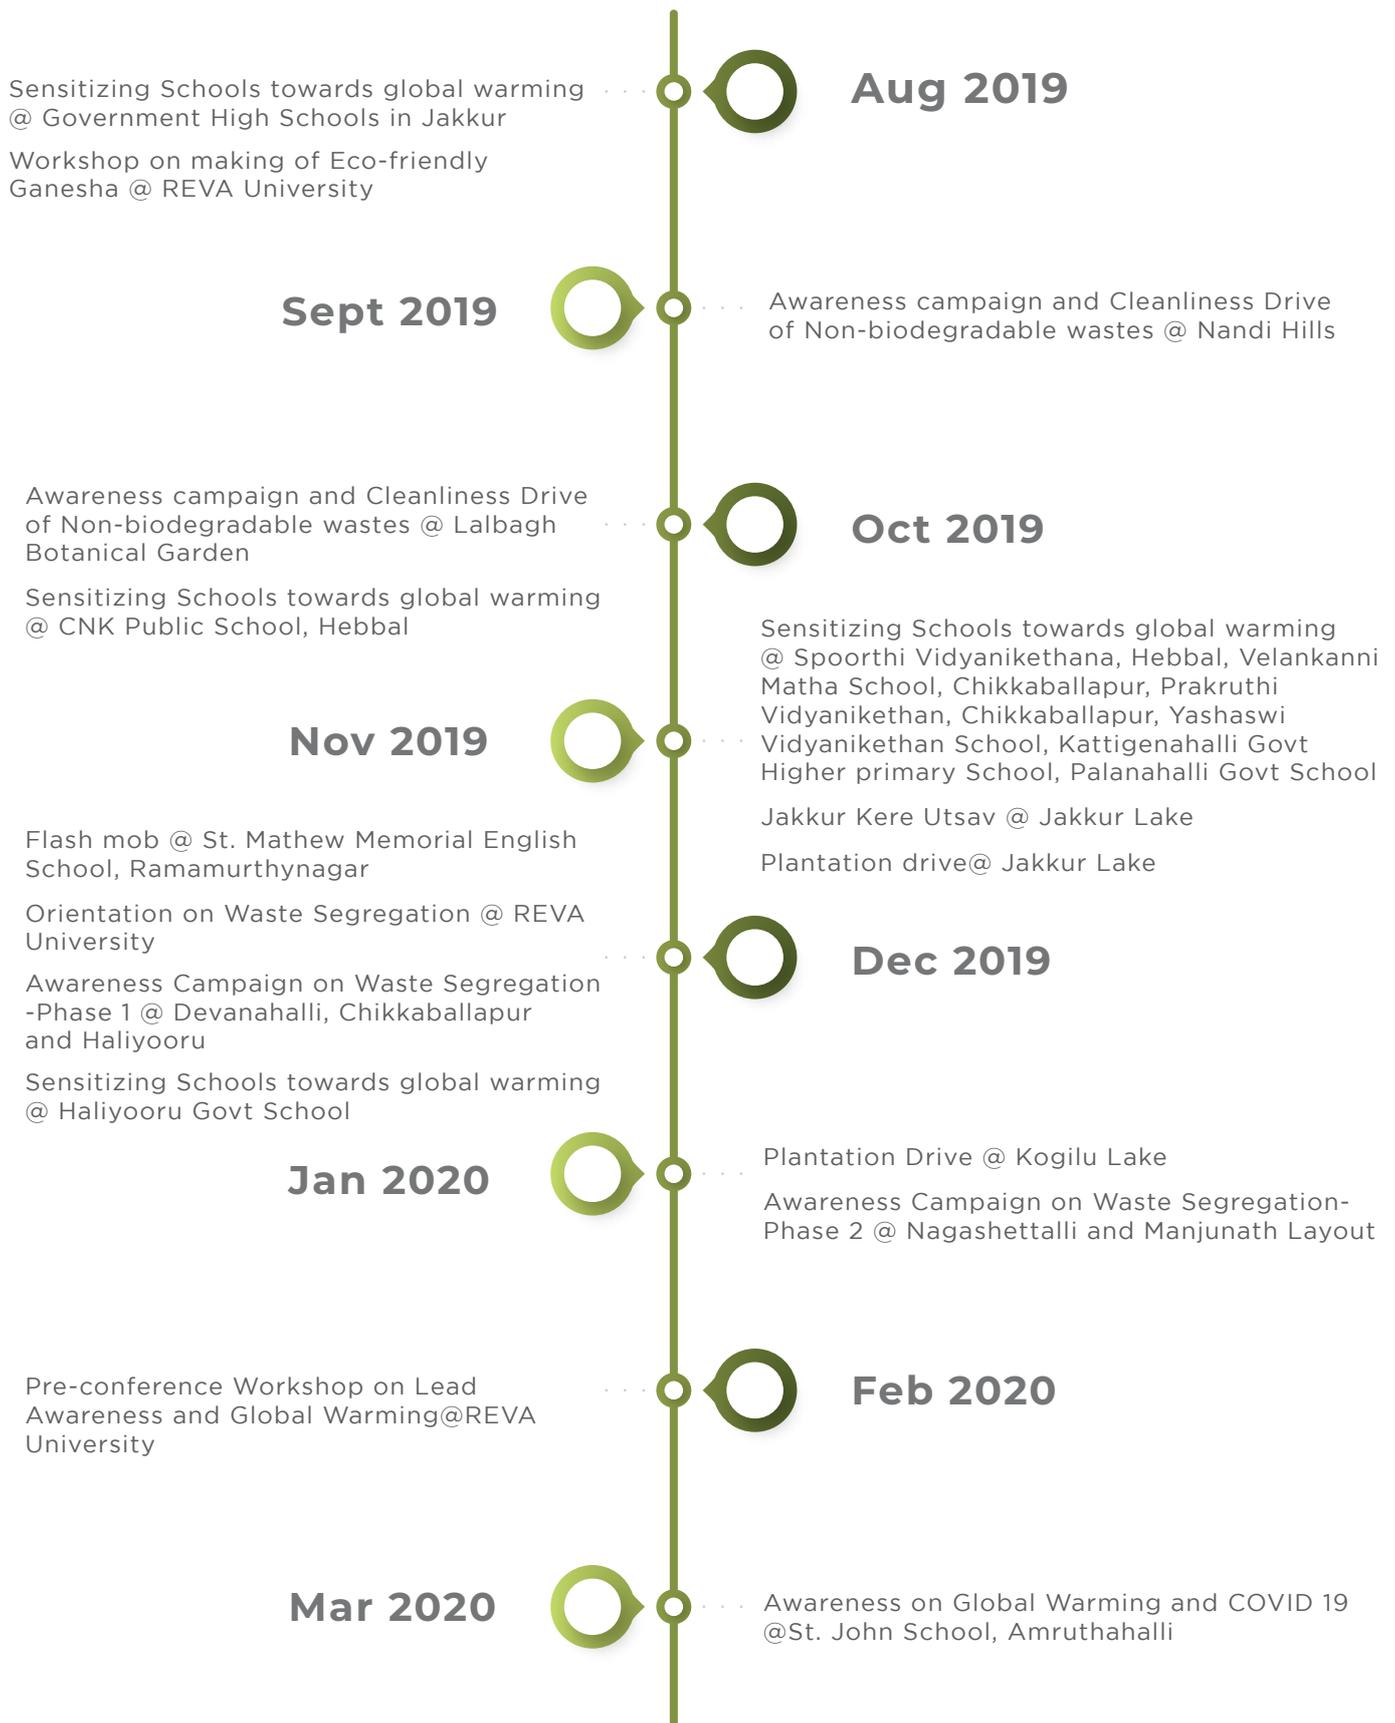

## Preface

Post the overwhelming response for Jagruti towards Voting Rights, the Hon'ble Chancellor of REVA University, Dr P. Shyama Raju initiated Jagruti towards Global warming. The School of Applied Sciences (SOAS) was privileged to get this responsibility of conducting one of this pioneering initiative, termed "JAGRUTI 2- Awareness towards global warming". This task was very well taken up by the School and resulted in creating an awareness among the society about the problems like global warming and waste management. This campaign started in Aug 2019 with an auspicious beginning as a workshop towards "Making of "Eco-friendly Ganesha". The noteworthy participation and enthusiastic approach by faculty members and students of SOAS towards the awareness programs and campaigns was an inspiring and overwhelming moment.

There were several activities being conducted towards the enhancement of learning about global warming and skills development towards waste segregation and its proper management in society. The programs focused on the various critical aspects of global warming like pollution, water management, waste segregation and its management. These programs succeeded in terms of spreading the awareness message and the desired message among society i.e., "Our very being, essence, health and happiness depends upon our interconnectedness with the environment. Our very survival as a human community depends upon the survival of Earth".

# Jagruti - Chronicled

## Jagruti towards Global Warming-an overview

An awakening! A rise to action, a quiet revolution that could only be fostered amidst a growing intellectual community like REVA. Despite several lakes and a good amount of natural wellbeing, “Namma Bengaluru” is facing the problem of rising pollution, increase in atmospheric temperature and several other environmental hazards. The increase in pollution and global warming, not only in Bengaluru but throughout the nation and around the globe has become an alarming notice to humankind. Keeping this in mind, REVA University with the firm guidance of Dr P. Shyama Raju, Chancellor, REVA University. Jagruti started the awareness program in terms of spreading the concern and awareness for global warming. Jagruti is an outreach initiative of REVA University wherein this time the theme was a campaign on awareness towards global warming. Jagruti is a thought process that translates into actions big or small but sure enough for a transformation to take place. The purpose is to move beyond the portals of the classroom in seeking to integrate with larger communities outside and go through a transformative and collaborative learning process. The School of Applied Sciences was glad to co-ordinate the Jagruti towards Global warming campaign. This program focused on people from all ages and spread the message of **“Go green and save the Earth”**. Altogether Jagruti has insisted on the social responsibilities of the young minds and other citizens to keep the environment clean and safe. This is a transformation involving students who are future leaders and will carry forward the legacy of caring for the environment. The campaign which began in July, 2019 continued actively on an active, aggressive mode till the culmination on the 19th of June, 2020. In spirit, the campaign will continue to protect the globe....

## An auspicious inception...

Post the overwhelming response to Jagruti towards Voting Rights, the Chancellor of REVA University, Dr. P. Shyama Raju initiated Jagruti towards Global warming in 2019. The School of Applied Sciences of REVA University took up the task of coordinating for Jagruti towards Global warming. The school organized the Inauguration of Jagruti-2 on 29/08/19 at the Amphitheatre, C V Raman Block, REVA University. It was an auspicious beginning as

it was followed by a workshop on Making of "Eco-friendly Ganesha". The Inauguration was presided by Dr. P. Shyama Raju, Honourable Chancellor, REVA University. The Chancellor explained the significance, of Jagruti as a campaign and of how it is the step to the gathering that awakened a sense of social responsibility among young minds. The inauguration was followed by a workshop on Making of "Eco-friendly Clay Ganesha" led by Mr. Girish, an expert in Clay modelling. Around 70 students and 20

Faculty members were a part of this hands-on training. They were trained in the process which involved in making a Clay Ganesha. Many participants came up with their innovative creations giving a wonderful touch to Lord Ganesha. The end of the workshop was marked by a variety of Bappa idols. A blissful vision indeed!!

## Objectives of Jagruti - Towards global warming

- Create awareness on global warming.
- Sensitise Schools and Colleges towards global warming
- Provide platforms to interact with people about their responsibilities towards the environment
- Encouragement of people's towards understanding relevance of waste segregation and management of waste.
- Promote cleanliness drives in major areas of Bengaluru
- Nurture the young minds of our nation towards environmental hazards

## A glimpse of Jagruti activities....

Department of Biotechnology, School of Applied Sciences organized an awareness program on global warming for the students and faculty members of Government High school, Jakkur, Bangalore on 27th August 2019, as a part of Jagruti towards Global Warming. First and Second year students of B.Sc. Genetics along with Dr. Manjula.K R visited the School. The program started with a global warming awareness talk by Dr. Manjula, and followed by a song on global warming by our students. Students were enlightened about the theme through the skit performed by students. Competitions were held for High school children to assess their knowledge about the theme and to check the interest of these young minds in participating for such socially responsible programs. Program was concluded on an eco-friendly note with distribution of plant saplings.

## Go Green Initiative at Nandi Hills

The School of Applied Sciences organized an “Awareness campaign and Cleanliness Drive of Non-biodegradable wastes” as a part of Jagruti Towards Global warming. The first session of this drive was cleaning up of Non-Biodegradable wastes at Nandi Hills, Bengaluru. It was conducted on September 14th, 2019. 200 students from various departments of the School were a part of this campaign along with 20 faculty

members. Dressed in green attire, students dispersed to different areas at Nandi Hills and picked up non-biodegradable wastes including glass bottles, wrappers, plastic bottles, plastic covers etc. At the end of the day, students were able to collect around 25 gunny bags of waste which was handed over to the authorities for proper disposal. REVA University is extremely thankful to Mr Ramesh, Deputy

Director, Nandi Hills for his immense support and permission. Our mission on spreading awareness on Global Warming is at full throttle. Let’s come together, participate and make the earth a better place to live.

## Step towards a Clean Bengaluru

On the occasion of Gandhi Jayanthi, the School of Applied Sciences organized an Awareness Campaign and Cleanliness drive of Non-Biodegradable wastes at Lalbagh Botanical garden. The drive was flagged off by Dr. P. Shyama Raju and Mr. Chandrashekar, Deputy Director of Horticulture, Bengaluru. Around 600 volunteers comprising students and staff of the University took part actively in the collection and disposal of Non-Biodegradable wastes within Lalbagh premises. As a part of the campaign, a survey on CO<sub>2</sub> levels in and around Lalbagh was carried out by the students and faculty of Biochemistry dept. Biochemical analysis was also performed by collecting blood samples of people who worked there and those who come for walking regularly. The causes and prevention of Global warming were depicted through a flash mob by the students near the main gate. As a part of the campaign, the experts from the Wildlife Conservation Society enacted a street play on “Snake Bite: Survival Guide”. This drive was a stepping stone to many forthcoming events planned by the University.

## Collaborating with the social groups for a Better Cause

The Bruhat Bengaluru Mahanagara Palike-Lakes Division and the Jala Poshan Association hosted the Jakkur Kere Utsav from 9th November to 8th December, 2019, which was a step towards celebrating our natural heritage and reviving the lakes in Bengaluru. Our team Jagruti from the School of Applied Sciences took part in the Inaugural programme held at Jakkur lake on 10-11-2019 and extended help in coordinating the event. Shri Krishna Byregowda, the Ex-Minister addressed the

gathering on the occasion and gave an insight on importance of water and rehabilitation of lakes in Bengaluru. The programme also included felicitation to people working in the development of Jakkur lake, the launch of magazine Jalashodana and initiation of the Nature's Gurukul programme.

## Plantation drive: “Small Sapling, Happy living”

Team Jagruti from the School of Applied Sciences was a part of the Plantation drive held at Jakkur lake on 24-11-2019. A team of 6 members actively took part and planted 70 saplings provided by the L T limited. The volunteers also attended a talk on ground water recharge and its importance in the current scenario. The volunteers were also a part of the demonstration on rain recording and water quality testing.

## Plantation Drive at Kogilu Lake

A noble initiative was undertaken on 4th January 2020 to plant 500 saplings of native tree species by the faculty members of the School of Applied Sciences on account of Founder’s day, a special event organized to commemorate the birthday of our Honourable Chancellor Dr P. Shyama Raju. The saplings were planted in the vicinity of Kogilu Lake at Srinivasapur (Yelahanka Post, Bengaluru - 560 064), close to REVA University campus. The Corporater of Ward no. 5, Mr. Munindra Kumar was also present at the venue and addressed the gathering on importance of green revolution and encouraged the volunteers in taking up socially responsible initiatives.

## Nurturing young minds...

Team Jagruti took a firm initiative in terms of educating young minds concerning the issue of global warming. In this regard, the team from the School of Applied Sciences, visited different schools like Yashaswi Vidyanikethana School, Kattigenahalli, Government Higher Primary School and Palanahalli Government School and Mathew Memorial English School, Ramamurthynagar on 22.11.19, 30.11.19 and 10.12.19. The students at the school were addressed on Global warming, its consequences and measures to avoid them. A quiz competition on Global warming was conducted and prizes were given to the top 5 students.

## Orientation and Awareness campaign on Waste Segregation Phase I and II

The School of Applied Sciences in connection with Jagruti towards Global Warming organised an orientation on Waste Segregation on 24-12-19. The Resource persons were Mrs Latha Krishnan, Architect and Mr Vinayak Iyengar. A live demonstration on composting was demonstrated to the audiences, which made the people aware of the types of waste being generated in the society and being responsible towards how we can segregate waste and simultaneously utilize the large proportion of that waste, through converting it into compost. This message was further taken to society in terms of awareness program regarding waste segregation and “SAY NO TO PLASTICS” which was conducted in two phases I and II.

Phase I campaign was conducted on 27-12-2019 in the villages of Chikkaballapur, Devanahalli, Haliyooru and Yeliyooru. Jagruti volunteers visited around 2000 houses and conveyed to people about the importance of waste segregation and the consequences of using plastics. The team also distributed jute bags as the part of NO TO PLASTICS campaign. The campaign was well received by the villagers and also supported by the respective municipalities

Phase II consisted the awareness program about waste segregation at Nagashettalli and Manjunath Layout, Bengaluru on 14th of January 2020. The campaign was inaugurated by Mr Randeep (Special Commissioner, BBMP) who also addressed the volunteers on the importance of saving mother earth for our future and how youth can contribute towards change in the society through these awareness activities. The corporator of Ward 18, Mr Anand also addressed the volunteers about the necessity of creating the awareness towards no use of plastics. He also appreciated the initiative taken up by our University and the enthusiastic behaviour shown by the students towards organizing such campaigns. The health inspector, Assistant engineers of ward 18 and Mr Vignan Gowda, social worker were also the part of the inauguration. The campaign was a door to door campaign, wherein the volunteers created awareness among the people on different waste segregation methods and addressed them about the importance of switching towards the usage of eco-friendly practices in day to day life. The volunteers visited around 1500 households in and around Nagashettalli and Manjunath Layout and distributed jute bags conveying the message of no to plastics.

## LEADCON 2020 - An awareness towards lead toxicity

Phase II consisted the awareness program about waste segregation at Nagashettalli and Manjunath Layout, Bengaluru on 14th of January 2020. The campaign was inaugurated by Mr Randeep (Special Commissioner, BBMP) who also addressed the volunteers on the importance of saving mother earth for our future and how youth can contribute towards change in the society through these awareness activities. The corporator of Ward 18, Mr Anand also addressed the volunteers about the necessity of creating the awareness towards no use of plastics. He also appreciated the initiative taken up by our University and the enthusiastic behaviour shown by the students towards organizing such campaigns. The health inspector, Assistant engineers of ward 18 and Mr Vignan Gowda, social worker were also the part of the inauguration. The campaign was a door to door campaign, wherein the volunteers created awareness among the people on different waste segregation methods and addressed then about the importance of switching towards the usage of eco-friendly practices in day to day life. The volunteers visited around 1500 households in and around Nagashettalli and Manjunath Layout and distributed jute bags conveying the message of no to plastics.

The inaugural session was followed by a series of lectures from eminent speakers on diverse topics related to lead. The first talk was by Dr T Venkatesh on “Lead Awareness and Global warming” which was followed by an amazing lecture by Dr Anita R Bijoor on “Sources and health effects of Lead”. The next talk was given by Prof. N Shashidhara on “You be a LEADer” followed by a

presentation by Prof. L.Pugazhenthly on “Lead and You- Working and living safely”. The gathering was addressed by Prof. Sripathy L on “Cultural practices leads to Lead poisoning in India” followed by Dr Abbas Ali Mahdi on “Lead toxicity an occupational hazard”. The sessions were concluded by a Panel Discussion on “Lead Awareness and Global Warming”. In a nutshell, all the lectures poured out an immense knowledge on how Lead is affecting at various levels.

## Awareness program regarding Global warming and COVID-19

Department of Biotechnology, School of Applied Sciences conducted an awareness program towards global warming and COVID -19 at St. John English School, Amruthahalli, Bangalore on 10.3.2020. The awareness program was conducted under the Jagruti initiative program conducted by REVA University. The awareness program initiated with the presentation about global warming, its complicated scenario and measures to reduce this threat of global warming. Simultaneously another presentation was delivered by the students which provided information about COVID-19, about the Coronavirus and all precautionary measures which would help a common man stay away from this life-threatening disease.

Post presentation, Quiz competition and other events were conducted for school children on the theme of global warming and Coronavirus. Finally, there was a short skit conducted by the University students to make the audiences understand the COVID-19 and its lethal complications. Finally, the winners of quiz competition were awarded with different prizes and the school authority was thanked for their support towards making the program successful.

## Testimonials

“ It makes me feel good, enthusiastic and to see that the young minds are being focused in the right way knowing their responsibilities for society and nature. I feel grateful to REVA University for starting such a wonderful towards campaign reating awareness towards environmental safety. The wonderful work carried out by the faculty and students of REVA University under the leadership of Chancellor Dr P Shyama Raju is very inspiring and thought-provoking. I would like to thank REVA University for their inestimable generosity of providing the support in terms of cleanliness drive in LAL BAGH. The dedicated effort of students and guidance by the Faculty members were very much decisive. My best wishes are always with REVA University for their upcoming events of Jagruti”

**Mr. Chandrashekar, Deputy Director of Horticulture, Bengaluru**

There are few times when no amount of appreciation could possibly fit the circumstance and that is how I feel when young students reach out to make their environment a better place. Firstly, I would like to congratulate REVA University for their step of Jagruti towards Global warming. It's encouraging and very refreshing to see the University's faculty and students have such a concern for the community! I would like to thank them for their immeasurable generosity of having students to clean up Nandi Hills. The advice and leadership of Faculty members were crucial in this immaculate cleaning. I wish them all the best for their upcoming events of Jagruti and all other events that would rise the sense of social awakenings among young generations

**Mr Ramesh, Deputy Director, Nandi Hills**

It is indeed a happy moment to thank REVA University and the students for their wonderful social initiative. The way students conducted themselves and created awareness among the people of Nagashettalli and Manjunath Layout is commendable. Distribution of jute bags and the awareness created in why we have to stop using plastics is really the need of the hour. Such initiatives are truly benefitting for the society. I take the pleasure in thanking and congratulating Dr. P Shyama Raju for having rendered such courteous help in educating people.

**Mr. Anand M, Corporator, Radhakrishna temple ward (no. 18)**

## Student Thoughts...

As a student of REVA, I feel so overwhelmed and privileged to be a part of such a social campaign which focusses on not only creating awareness about global warming among the students and the people in and around, but has also worked enthusiastically towards improving and maintaining quality of nature and life. It has been a remarkable revolution towards being a responsible citizen in protecting our environment from all kinds of man made environmental mishappenings by practising and employing eco-friendly ways. From a plastic free Campus, afforestation to ensuring proper disposal of non-biodegradable wastes in and around areas across Bengaluru, it has had a great impact on all the other educational institutes and sectors of the city and the country on the whole, it has been successful in enlightening the youth to make the Earth a better place to live in. REVA has truly proven that actions speak louder than words, through Jagruti. To be a part of Jagruti would be forever a Pride for every REVAITE.

**Aishwarya, M.Sc, Chemistry**

We learnt significant life experiences that influenced us to care for nature. We got to learn views on the development of environmental education. Our awareness of nature is derived from direct experience and observation, thanks to Reva University and the Jagruti team, I got to experience it.

**Gnana Sindhu, M.Sc.,  
Physics**

Jagruti events gave us an opportunity to explore more about the society we live in... Not only about the place we live but also about each individual's responsibility to make it a better place...we had a lot to learn from each journey we travelled may it be the cleanliness programme at Nandi hills as an initiative towards global warming to creating awareness towards among students.... It was a great experience to all of us...

**Priyadarshini, M.Sc.,  
B.Sc. BBG**

It's was an awe-inspiring initiative by our University that made us participate in the campaign on global warming. At the same time, the campaign educated us about the unadorned solutions that we can follow to tackle it. The initiative encompassed tasks like clearing the plastic litter in many places of the city for eg:- Nandi hills and enlightening the locals about the importance of cleanliness and importantly inspecting the amount of carbon emissions across the different places of city for eg:- Lalbagh botanical garden. The prime toil was mainly involving young minds who were guided by teachers along with our Chancellor. It taught us the importance of Green and Healthy planet and the take away that we could follow to maintain the same.

**Deepika R, M.Sc  
Biochemistry**

It was a good experience to be a part of Jagruti and we also learnt good leadership skills being a part of the campaigns and Cleanliness drives. We understood how important it is to save nature and preserve it for our future. Thank you REVA university.

**Meera, M.Sc, Mathematics**

## An additional bonanza to lead their way in Academics!!!

Jagruti a social outreach initiative actually integrated within it a huge learning paradigm too. All the activities taken up through Jagruti involved students moving beyond the confines of formal classrooms and learning and sharing valuable skills as well as lessons in environment conservation. The biggest take away from the initiative was a connect with environmental concerns and also an awareness of the contribution from each one of us towards preserving the environment. The number of events the students participated in fetched them marks as a part of their assignments.

way by being socially responsible citizens, students could also gain some personal academic benefits.

## Learning outcomes from Jagruti

- Students gained the intellectual flexibility necessary to view environmental questions from multiple perspective.
- Students learned to communicate with laymen and could spread awareness to them on waste segregation
- Reflecting upon their internalized values system, students will continue to evolve an individual vision of harmonious and sustainable interaction among humans as well as between humans and the rest of the natural world.
- Understanding the criticality of the current environmental situation and the need of the hour to find a solution.

- Understand and participate in developing a positive change in campus, local, national and global communities.
- Students learn to work positively and cooperatively with their team which is necessary in terms of career building.
- Build leadership qualities and triggering thought leadership.
- Integrating environment into everyday lives to become sensitive to the natural environment around.

Though the activities of Jagruti has come to a formal conclusion, the awareness and the sensitivity created through the initiative will go a long way in a transformational change in each one of us and carry forward the legacy of preserving and caring for the environment in the larger interest of humankind and all life forms. Jagruti as a journey has just begun...

# Showcasing Jagruti

**University conducts cleanliness drive at Lalbagh**

REVA University School of Applied Sciences conducted a cleanliness drive and awareness campaign on global warming at Lalbagh Botanical Garden recently. Around 530 students of REVA University took up the responsibility to create awareness on global warming through a cleanliness drive at Lalbagh Botanical Garden on October 2.
